## Landscape Management and Logical Components - Start Screen

Namespace: active Help

Overview Hosts Technical Systems Product Systems Logical Components

**Landscape Management and Logical Components**

In the Landscape Management Database (LMDB) of SAP Solution Manager, you can display, edit, and create information about technical systems, hosts, and product systems, centrally.

1. For most technical systems, automatic data suppliers send system information to the System Landscape Directory

2. **SAP Solution Manager IT Service Management**

3. Share Personalize System News Log Off

UX Design Services

## *SAP Fiori UX*

*speaks a consistent design language and makes use of common technical infrastructure. By blurring traditional computing boundaries and by using interactive and attractive UI elements, SAP Fiori UX provides a consistent end-to-end user experience and can be used across all device types!*

***SAP Fiori* is an intuitive, personalized and user focused way to work with excellent design of the next-generation.**

- ...Improve user productivity by simplifying and automating day-to-day tasks across any device
- ...Boost user adoption with an appealing UX design tailored to key tasks and activities
- ...Increase compliance and data quality by making it easier to enter information into your system of record
- ...Reduce training and support costs with simple, role-based screens that speed ramp-up and minimize user errors
- ...Easily extend or build customized SAP Fiori apps with SAP developer tools and technology

- Transactional Apps
  - Transactional tasks, e.g. creating a salesorder
- Fact Sheets
  - Display contextual information and key facts
  - Only for SAP Hana
- Analytical Apps
  - Realtime collecting and displaying of key figures
  - Only for SAP Hana
